

Family tree project

**"A posthum honor" - "A consciousness development about our common origin" -
"The place where we come from determines our way to go"**

Consequently, in the name of all members of Gehring-Bandow Genealogy, we passionately **appeal to everyone to fulfil himself in genealogical engagement**. Thinking and feelings structures run through epigenetical graving for generations in our family tree. "Only awareness can help knowing about **undiscovered potential** and how to **change for the good**"

Following the principle of this organization we exemplarily relate to the *genealogical composition of the creator* - is has references to thousands of DNA-related relatives and ancestors of the compiler.

It sticks to a holistic principle and includes family lines from the very west to the very east of former Prussian territory.
